PROFILE

Cloud and Infrastructure Engineer with 7+ years of experience spanning Google Cloud Platform networking, hybrid enterprise infrastructure, systems architecture and software development. Experienced in designing secure, scalable infrastructure solutions while combining deep technical expertise with strong stakeholder management and cross functional collaboration. Proven track record of leading infrastructure initiatives, resolving complex technical challenges, automating engineering workflows, driving AI adoption through practical GenAI solutions, and translating business requirements into reliable technical solutions across global enterprise environments.

SKILLS

Google Cloud Platform: Virtual Private Cloud, Hybrid Connectivity, Cloud DNS, CDN, Load Balancing, Google Kubernetes Engine, Kubernetes Networking, Infrastructure automation (Terraform)

IT infrastructure management: LAN/WAN & Data-centre Design, Zero-Trust Security, Disaster Recovery, ITIL Incident & Change, Architecture Reviews, Technical Enablement & Documentation, Vendor & Asset Management, System & Incident Monitoring, Automation Scripting (Python, PowerShell, Bash), Log Analysis, Process Optimization & Performance Analysis

Programming: Python, SQL, HTML, CSS, JavaScript, jQuery, Bootstrap 3&4, Quasar, Streamlit

Languages: English - Full professional, Hungarian - Native, German - B2, Limited working efficiency, Spanish - Elementary, Dutch - Learning

HIGHLIGHTED PROJECTS

Anomaly detection in smart buildings

Jan 2025 - July 2025

Master Thesis Project, University of Amsterdam

Thesis Project

- Created a cyber-physical anomaly detection system for the University of Amsterdam's Lab42 smart building, combining NAIA clustering and LSTM-autoencoder models to achieve up to 98% detection accuracy.
- Designed an SQL-based data pipeline processing 38M+ sensor readings, enabling scalable, real-time fault detection for improved maintenance and sustainability.

Artiq

Feb 2025 – Present

REC Impact Innovation programme

StartUp

- Developed a data-driven platform that leverages machine learning and computer vision to match artists with galleries and collectors, based on clustering algorithms on their artworks. Designed to address the oversaturation of the art market, Artiq enhances visibility and opportunities for emerging artists.
- Part of the University of Amsterdam's REC Impact startup innovation program
- Constructed the business plan, and the MVP is under development. Personal involvement includes system design, front-end development, cloud infrastructure hosting and general social networking.

EXPERIENCE

System Environment Designer

Jan 2026 – Present

Philips, Image Guided Therapy Systems

Eindhoven, NL

- Designing infrastructure solutions supporting the Test department of Philips Image Guided Therapy R&D, improving scalability and engineering efficiency.
- Serving as the technical lead for all IT infrastructure and engineering tooling within the Test department.
- Designing and implementing connectivity architectures for medical imaging test environments, improving reliability and performance.
- Owning IT security for a laboratory containing 30+ medical imaging test systems.
- Developing node.js and web based tools for automated data collection, reporting and planning, reducing manual engineering effort.

- Leading AI adoption within the department by introducing practical GenAI workflows, educating engineers and identifying automation opportunities.

Cloud Engineer

Jan 2023 – Aug 2024

Concentrix (TSR, bSME; Google Cloud Platform) - Google external workforce

Barcelona, ES

- Provided premium support for Google's largest customers on GCP networking products
- Collaborated with customer engineering teams to resolve issues related to Kubernetes, Load Balancing, hybrid connectivity, network performance and Cloud DNS
- Advised customers on their network infrastructure, providing best-practices and blueprints for connectivity architecture and performance tuning
- Qualified as Subject Matter Expert, offering guidance to colleagues locally and worldwide
- Experienced managing high-pressure (P1) situations, while ensuring resolution time within SLA set by priority and urgency
- Communicating complex technical fixes clearly to both technical and non-tech stakeholders, e.g. configuring MTU sizes and potential errors related to them

Ops Engineer Infrastructure

Apr 2021 – Jan 2023

ING Bank N.V. – Hungary Branch

Budapest, HU

- Maintained, developed and managed IT infrastructure across the main office, two data-centres and a disaster-recovery site
- Represented IT requirements during (the 2600 m²) office relocation and renovation, including physical network cabling
- Managed and facilitated the implementation of audio-visual equipment and physical security systems for the 180-person office
- Represented the IT infrastructure department in regular C-level meetings for budget planning, solution design and operations
- Acted as central point of contact for colleagues, vendors and regional network support teams in Poland and the Netherlands
- Implemented security measures based on in-house and external penetration-test findings; contributed to network redesign and life-cycle-management projects
- Facilitated incident management and operational tasks during maintenance windows and recovery testing, following ITIL-based change control procedures.
- Hands-on experience with operating systems and network infrastructure in a high-availability environment

IT Infrastructure Trainee

Sep 2020 – Mar 2021

ING Bank N.V. – Hungary Branch

Budapest, HU

- Assisted the IT Infrastructure department with ad-hoc tasks, facilitated the office relocation and ran on-site disaster recovery tests

Web Designer / Front-End Developer

Mar 2018 – Aug 2020

UTAZÁSIRENDSZER Kft.

Budapest, HU

- Developed responsive websites for travel agencies according to chosen designs, in HTML, CSS, SASS, Bootstrap 3/4, JavaScript and jQuery
- Guided customers to ensure smooth launches, provided ongoing maintenance and presented new solutions and trends to them

EDUCATION

University of Amsterdam

Amsterdam, NL

M.S. in Information Studies, Information Systems

Sep 2024 – Jul 2025

- Thesis: "Anomaly detection in smart buildings: A case study of the University of Amsterdam's Lab42 building"

Corvinus University of Budapest

Budapest, HU

B.S. in Business Informatics

Sep 2016 – Feb 2021

- Thesis: "Customer Profiling in the Travel Industry"

CERTIFICATIONS

Google Cloud Certified Associate Cloud Engineer

Jun 2023

<https://google.accreditable.com/6f88660a-7cca-46f9-83fd-888b708a1dff>

OTHER ACTIVITIES

Operating Systems and Networking Education

Developed and taught a 20 hours course for 20+ vocational students

Barcelona

Nov 2025

AnyAge.ai Hackathon

4-9th place

Leiden, NL

Jun 2025

Blue Ribbon “Kékszalag” Round-Lake-Balaton Sailing Race

137th - 282nd place

Lake Balaton, HU

2022 - 2025

Youth organisation group and camp leader (volunteering)

Hungary

2016 - 2021
